

## Happy birthday

### 1.Learning goals

In this lesson, we mainly learn how to control the color of RGB by micro:bit and Super:bit expansion board.

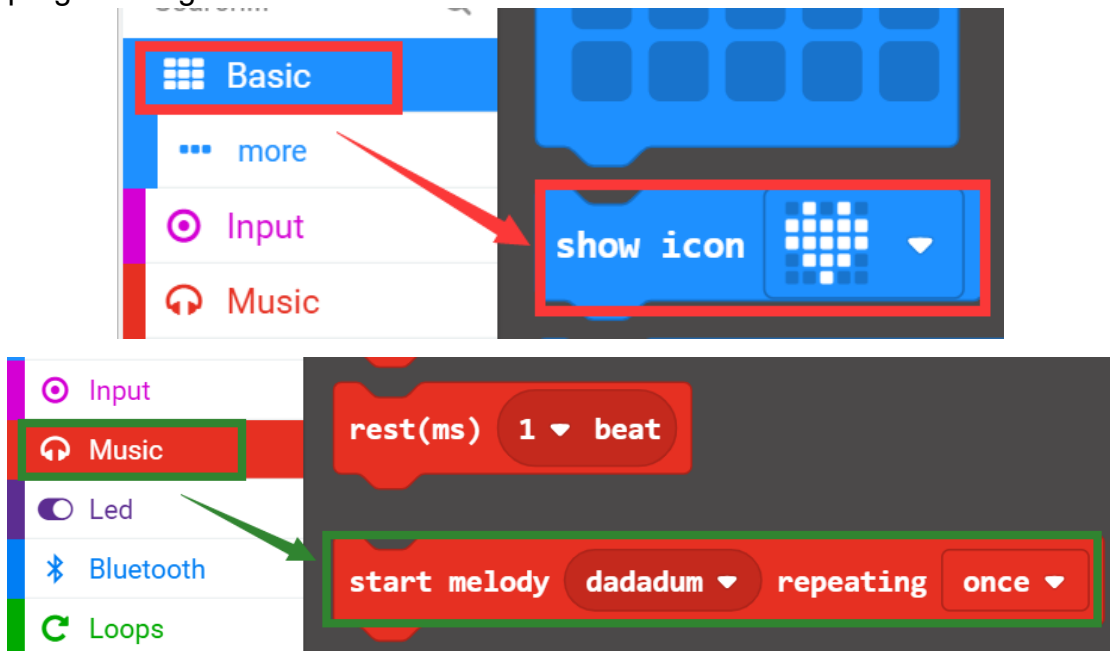

### 2.Programming method

**Mode 1 online programming:** First, we need to connect the micro:bit to the computer by USB cable. The computer will pop up a USB flash drive and click on the URL in the USB flash drive: <http://microbit.org/> to enter the programming interface. Add the Yahboom package <https://github.com/lzty634158/SuperBit> to program.

**Mode 2 offline programming:** We need to open the offline programming software. After the installation is complete, enter the programming interface, click **【New Project】**, add Yahboom package: <https://github.com/lzty634158/SuperBit>, you can program.

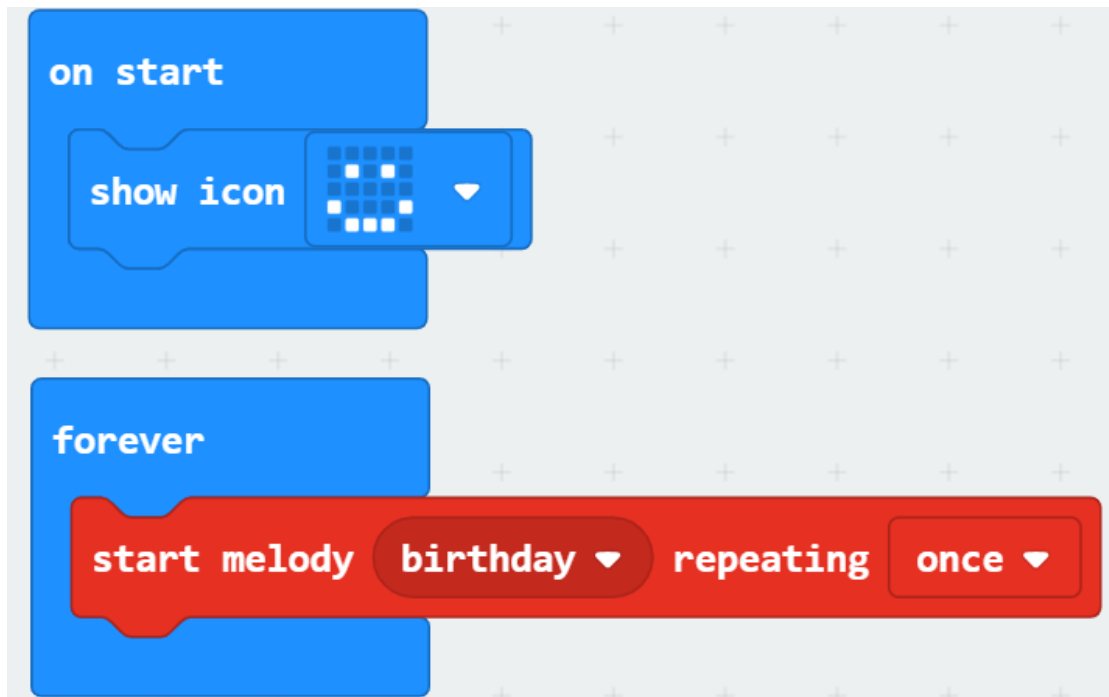

### 3.Looking for blocks

The following is the location of the building blocks required for this programming.

### 4.Combine building block

The summary program is shown below:

### 5. Experimental phenomena

After the program is successfully downloaded, the micro:bit dot matrix will display the smile pattern. The buzzer will play music “happy birthday”.
